

## Professional Profile

Experienced Full-Stack Software Developer with 7+ years delivering scalable SaaS platforms, distributed microservices, and high-performance web applications across eCommerce, EdTech, and safety-tech industries. Proficient in C#, ASP.NET Core, JavaScript/TypeScript, and React, with hands-on experience designing RESTful APIs, event-driven microservices, and CI/CD pipelines in Azure and AWS environments. Demonstrated ability to own complex feature delivery end-to-end — from architecture and back-end services through to front-end SPAs — while mentoring developers and collaborating across cross-functional teams. Experienced with SQL Server, RabbitMQ-based messaging, Docker containerisation, and automated testing (TDD), with a strong commitment to code quality, performance optimisation, and Agile practices.

## Technical Skills

|                |                                                                                                                  |
|----------------|------------------------------------------------------------------------------------------------------------------|
| Languages      | C#, TypeScript, JavaScript, PHP, SQL                                                                             |
| Back-End       | ASP.NET Core, .NET Core Microservices, Node.js, RESTful APIs, GraphQL, Azure Functions, AWS Lambda               |
| Front-End      | React, Next.js, Angular, HTML5, CSS3, Tailwind                                                                   |
| Databases      | MySQL, PostgreSQL, MongoDB                                                                                       |
| Messaging      | RabbitMQ                                                                                                         |
| DevOps / Cloud | Azure (WebApp, Functions, CDN, DevOps), AWS (EC2, Lambda, S3, API Gateway), Docker, GitHub Actions, GitLab CI/CD |
| Testing        | TDD, MSTest, automated test frameworks, CI-integrated test suites                                                |
| Practices      | Clean Architecture, DDD, CQRS, Agile/Scrum, code reviews, mentoring                                              |
| AI-Workflow    | Claude Code · GitHub Copilot · ChatGPT (subscribed & daily use)                                                  |

## Experience

**Full Stack Developer** Munro Footwear Group

**Jan 2025 – Current**

Full-stack eCommerce development on a large-scale headless platform using React, Next.js, and Adobe Commerce (Magento), with AWS Lambda/API Gateway integrations connecting to Infor M3 ERP.

### Key Responsibilities:

- Full-stack e-commerce development:** Design, build, and optimise large-scale web platforms using **React**, **Next.js**, and a **headless Adobe Commerce (Magento)** backend, delivering high-performance, accessible, and SEO-optimised user experiences.
- System integration & optimisation:** Implement and maintain integrations between **Infor M3 ERP** and **Magento** via **AWS Lambda and API Gateway**, enhancing data synchronisation, scalability, and overall site performance through best-practice front-end architecture.
- Technical leadership & collaboration:** Partner with UX, DevOps, and global teams to deliver Agile sprints through **CI/CD pipelines**, mentor developers in coding standards, and continuously improve MFG's digital commerce capabilities.

### ▶ Key Achievements:

### **Main Developer – [Midas Shoes](#) Migration**

- **Led the migration** of the Midas Shoes eCommerce platform from Classic Magento to a Headless CMS + Next.js stack, achieving **40% faster load times**(Light House Score) and improved SEO rankings.
- Engineered integrations between **Magento, AWS Lambda**, and legacy ERP systems for **real-time data synchronisation** and scalable performance.
- Delivered the platform **on time and within scope**, enhancing site stability, maintainability, and user experience across all touchpoints.

### **Multi-Site Migration Project**

- **Contributed to the large-scale migration** of key Munro Footwear Group brands — [Williams Shoes](#), [Styletread](#), [The Trybe](#), and [Mathers](#) — from Classic Magento to a unified **Next.js** platform, ensuring scalability and consistency across multiple domains.
- **Standardised shared architecture and reusable UI components**, reducing duplicated code and improving site maintainability and performance across all brand sites.
- **Collaborated with UX/UI and DevOps teams** to streamline deployment through **CI/CD pipelines**, improving accessibility compliance and achieving consistent user experiences company wide.

### **Apple Pay Express Checkout**

- **Implemented Apple Pay Express Checkout** across multiple eCommerce platforms to simplify the checkout process and reduce friction for end users.
- **Integrated the solution** within the existing **Magento–Next.js** framework, maintaining PCI compliance and enhancing payment security and performance.
- **Delivered measurable UX improvements**, reducing checkout time and cart abandonment while boosting conversion rates and customer satisfaction.

### **Australian Post Parcel Collection Integration**

- **Integrated the Australian Post Parcel Collection service** into the Styletread eCommerce ecosystem, enabling customers to select convenient parcel pickup locations during checkout.
- Developed and connected both **frontend (Next.js)** and **backend (Magento)** components, ensuring seamless data flow between the user interface, order management, and logistics APIs.

## **RM<sup>plc</sup> Software Engineer** RM PLC (LSE Listed- [Code: RM](#)) **Oct 2021 – Jan 2025**

Full-stack SaaS development on Assessment Master — an internationally deployed EdTech platform — with primary focus on C#/ .NET Core microservices back-end, Angular front-end, and SQL Server data layer.

### **Key Responsibilities:**

- **Full-Stack SaaS Development:** Designed and delivered end-to-end solutions across **front-end, back-end, and database layers**, including API design, data processing, and UI/UX development with optimised SQL queries for performance and scalability.
- **Accessibility & CI/CD Excellence:** Ensured **WCAG 2.0–2.2** compliance and maintained deployment quality through **Azure DevOps**, automated **CI/CD pipelines**, and Agile sprint management in **Jira**.
- **Collaboration & Mentorship:** Partnered with international clients to translate complex requirements into deliverables and mentored junior developers in **Angular, Node.js**, and coding best practices to strengthen team capability.

## ► Key Achievements:

### **Lead Developer - PISA2025 (Programme for International Student Assessment):**

- Took ownership of the *PISA2025* assessment platform after the project lead's departure, ensuring stability and delivery continuity for the OECD-Europe international education program.
- Lead redevelopment and feature delivery under tight deadlines while managing stakeholder expectations and maintaining cross-regional communication.
- Acted simultaneously as **Project Manager, Analyst, and Lead Developer**, collaborating with OECD clients to translate requirements into actionable development tasks. Led design, QA, and production delivery of **WCAG-compliant** modules built with **React.js**, **TypeScript**, **PHP**, **Chart.js**, and **Blockly**.
- Successfully delivered two major platform modules **on time and within scope**, improving system stability and usability for global researchers, while earning formal recognition from **OECD-Europe** for leadership, quality, and client collaboration.

### **Algorithm Design - ICILS Machine Marking (International Education Project):**

- Engineered a recursive algorithm to automate Blockly-based code evaluation for the ICILS international assessment, transforming manual review into a fully automated, scalable process.
- Drove Angular front-end modernisation, introducing modular architecture and reusable components that boosted performance and maintainability.
- Built data processing pipelines to auto-generate detailed scoring reports, cutting manual effort by over 70% and significantly improving assessment accuracy and turnaround time.

### **Lead Angular & Node.js Modernization:**

- **Spearheaded the upgrade of Angular (v14→18) and Node.js (v14→18)** for RM Australia's flagship **SaaS platform, Assessment Master**, modernising the tech stack for improved speed, scalability, and maintainability.
- **Redesigned front-end architecture** with modular components and best practices, enhancing code reusability, accessibility, and long-term sustainability.
- **Mentored junior developers in Angular and Node.js**, strengthening code quality standards and fostering a culture of technical excellence across the team.

### **Lead D3.js Data Visualization Upgrade:**

- **Led a full upgrade of D3.js (v4 → v7.9)** within the Assessment Master analytics platform, significantly improving **rendering speed, scalability, and interactive performance**.
- **Optimised data-visualisation pipelines** to handle large, complex educational datasets, reducing load times and improving responsiveness across dashboards.
- Delivered a **modern, insight-driven user experience**, empowering educators and researchers to interpret results more efficiently through advanced, dynamic visual analytics.

### **Test-Driven Development (TDD) Leadership:**

- Implementing automated testing frameworks and coding standards that **cut defects by 40%** and **improved release reliability and team productivity**.

**Web Developer** Letour Cycles

**Dec 2019 – Oct 2021**

E-commerce development and API integration across Shopify, Neto, eBay, and AusPost platforms.

### **Key Responsibilities:**

- **E-Commerce Development:** Designed, developed, and deployed **Shopify** and **Neto** online stores, delivering enhanced functionality and user experience.
- **API Integration & Automation:** Built and maintained seamless API connections for **order processing, tracking, and partner integrations** across **Shopify, eBay, Neto, and AusPost**.

ensuring real-time data synchronisation.

- **SEO & Data Management:** Implemented SEO-optimised product pages with dynamic metadata and monitored data flow across platforms to maintain accurate order and tracking information.

## ► Key Achievements:

### Wholesale Integration System Development

- Built an **API-driven Node.js integration** linking partner systems with **Neto eCommerce**, automating order import and fulfilment.
- **Launched wholesale operations from zero**, reducing manual processing by **80%** and enabling real-time order synchronisation across platforms.

**Full Stack Developer** Australian Trading Bridge

**Jan 2018 – Dec 2019**

### Key Responsibilities:

- **System Development:** Built a full-stack **product management and e-commerce platform** using **Laravel 5**, aligning functionality with business and sales objectives.
- **Architecture & Optimisation:** Designed **MySQL databases**, improved performance by resolving technical issues, and implemented **custom middleware** for scalability.
- **UI & Deployment:** Created responsive **Blade/Bootstrap** interfaces and deployed through **AWS EC2, Docker**, and **GitHub** in an **Agile/Scrum** environment.

### FHL Group IT support

**2016 – Jan 2018**

### Key Responsibilities:

- **API Management & Integration:** Managed and optimised APIs for PHP-based eCommerce systems, ensuring reliable communication between company websites, carriers, and third-party platforms.
- **Web Development & Feature Enhancement:** Developed new site features, including promotional templates and payment integrations, to improve customer engagement and conversion rates.
- **SEO & Product Optimisation:** Created and maintained SEO-friendly product listings with dynamic metadata, enhancing visibility and search rankings across platforms.

## Education

UNIVERSITY  
OF TASMANIA

**Bachelor of Computing (With Honours)**

**Feb 2011-Aug 2014**

- **Graduate Project:** Developed a Career Hub showcase website for future students using HTML, CSS, jQuery, and a Content Management System.
- **Honours Thesis:** *Using Hopfield Network to Understand Alzheimer's Disease* — applied **Artificial Intelligence, Neural Networks**, and **MATLAB** to model cognitive decline patterns.

**Academic Achievement:** Received 100% in two major assignments and tutorial work for *KXT309 Advanced Dynamic Web Development*, a full-stack project using LAMP and JavaScript/jQuery.
